

1. INTRODUCTION

Beauty care management system is a web-based salon management application with appointment scheduling functionality. In this system user can review salons and stylist online and can make appointment online. User can review the salons and their services using this system and can make appointment with favorite stylist online. User can also cancel appointments online.

User can also write and reviews about the salon or stylist. This system helps both the customer and the salon. Customer can easily find best salon in their locality and can check the review of other customer of that salon online. It helps him to take decision of taking the services of a particular salon.

Beauty parlour management system is developed to automate all the salon activity. Using this system user can manage their salon and also use this system to book appointment of his customer online.

1.1 Aim Of The System

- The purpose of this system is to provide facility to orders 24*7.
- To assist the user to book the appointment within the salon for online.
- It will help customers to save their considerable time; no endless walking to find services, no waiting in traffic jams and no waiting for billing.
- Consumers can services online from anywhere at any time.
- The aim of this system is to get a wide range of customers from around the globe.

1.2 Objective

- The main objective of Beauty salon is saved to time and complexity of work at beauty salon.
- By this you can see all types of services for yourself, parlour work and order according to your need.
- Maintain Customer detail
- Maintain Customer services Details
- Provide Better-Customer Services
- Reduce Management services

1.3 Scope Of System

- The website is highly flexible one and is well efficient to make easy interactions with the client.
- The key focus is given on data security, as the project is online and will be transferred in network.
- The speed and accuracy will be maintained in a proper way.
- The future depends on the beauty business.

1.4 Problem Defination

- Before We Creating This Web Site , We Ware Faces Many Problems.
- Our Salon Limitation Of a beautician don't chat and meet to personally.
- Don't forces a book appointment of holiday.
- User can not online payment only case on payment.

1.5 Core Components

The core components of the system are as follows :

➤ **Manage services :-**

In Manage service , service related task like adding new services , change services and remove services.

➤ **Manage package :-**

In Manage packages , packages related task like adding new packages , change packages and remove packages.

➤ **Manage Team Member :-**

In Manage Team Member , Team related task like adding new member , change member and remove member.

1.6 Project Profile

Project Title	Pariha Beauty Care
Operating system	Windows 11
Editor	Sublime
Front - End	HTML , CSS , JAVASCRIPT
Back - End	PHP , MYSQL
Project member	1
Project Guide	Miss Punam Patel
Submitted By	Sneha vaghasiya
Submitted To	Vishwabharti Girls Institute of commerce Management & computer Appliction

1.7 Assumptions And Constraints

The Assumptions and constraints of the system is as follows :-

- The website needs a stable internet connections to work .
- Pay cash on delivery.

1.8 Advantages And Limitations Of The Proposed System

Advantages :-

- **Convenience for Customers:** Customers can easily browse and book services online, view team members, and check prices and service details from the comfort of their homes.
- **24/7 Availability:** Customers can access information and book appointments at any time, even outside business hours, leading to increased bookings
- **Cost-Effective:** Once set up, running a website is relatively inexpensive compared to traditional advertising methods, with high returns on investment.
- **Easy Updates:** With a simple admin interface, you can quickly add, remove, or update services, team members, prices, and offers without needing technical knowledge.

Disadvantages :-

- Well educated people can visit or understand the content of this site. Non educated person may not visit this site easily. So, this is the common limitation of this system.
- As of now this system does not have the facility of making payments for their services , which will be applied in future.

2.REQUIREMENT DETERMINATION &ANALYSIS

2.1 Requirement Determination

- Requirement gathering is the base part of system planning. Most of the basic and hidden requirements need to be studied. It also includes users, system and hardware requirement.
- Requirement gathering means collecting and understanding the entire related requirement by all possible sources. By discussing with the users is the possible and easiest source of requirement gathering.
- To understand the natures of software to be build. The software engineer must understand the information domain for the software as well as the required functions, behaviour, platform, interface
- The requirements gathering processes are critical for the success of any software project. Requirement analysis is a process that determines tasks that are required to determine the need and conditions to design a new services or to make modifications in any existing services /application.
- This process considers all the stakeholders conflicting requirements and analyzes the documentation and validation of the system. The requirements should be actionable, measurable, testable and related to the defined needs of the system design.
- Free flow of ideas made us understand the benefit of the system, the performance desired and the approached to be used to meet the desired objectives. Our motto was to develop a quality product so we laid emphasis on quality control right from the time when we understand the concept.
- As such there is no existence of any equivalent application. They all are fully research development based applications. All kind of requirements are self-defined. Some kind of suggestion was invited from People.

2.2 Targeted Users

- User

Modules of the System:

- Admin
- User

Admin: -

- Admin Login
- Manage Services
- Manage packages
- Manage Team Member
- View Appointment
- View contact
- Admin Logout

User :-

- User Registration
- User Login
- User Forget Password
- View services
- View packages
- View Gallery
- View Team Member
- Appointment Book for user
- View Customer Review

3 System Design

3.1 Use Case Diagram

A use case diagram in the UML is a type of behavioural diagram defined by and created from a Use-case analysis.

A use case diagram is a UML diagram that provides a high-level graphical view of the functionality (use cases) supported by the system and shows which roles (actors) can invoke each use case.

Display the relationship among actors and use cases. Class Diagram models class structure and contents using design elements such as classes, packages and objects. It also displays relationships such as containment, inheritance, associations and others.

A diagram to show the various user roles and how those roles use the system. Here we use four roles of user in our website.

There are three key things we need to know to describe a use case:

- 1) Actor
- 2) Use Case and
- 3) System being designed

3.1.1 The Actor

The actor or actors involved. An actor is a type of user (for example, salesman) that interacts with the system. Actors represent roles that can be played by users of the system.

Those users can be humans, other computers, pieces of hardware, or even other software systems.

The only criterion is that they must be external to the part of the system being partitioned into use cases.

They must supply to that part of the system, and they must receive outputs from it.

3.1.2 Use Case

A use case describes what a system (or a subsystem, class or interface) does but it does not specify how it does it.

3.1.3 System Being Used (System Boundary)

A system boundary defines the scope of what a system will be. A system boundary of a use case diagram defines the limits of the system.

The system boundary is shown as a rectangle spanning all the use cases in the system.

The following diagram highlights the example of use case diagram with all three elements.

1) Admin

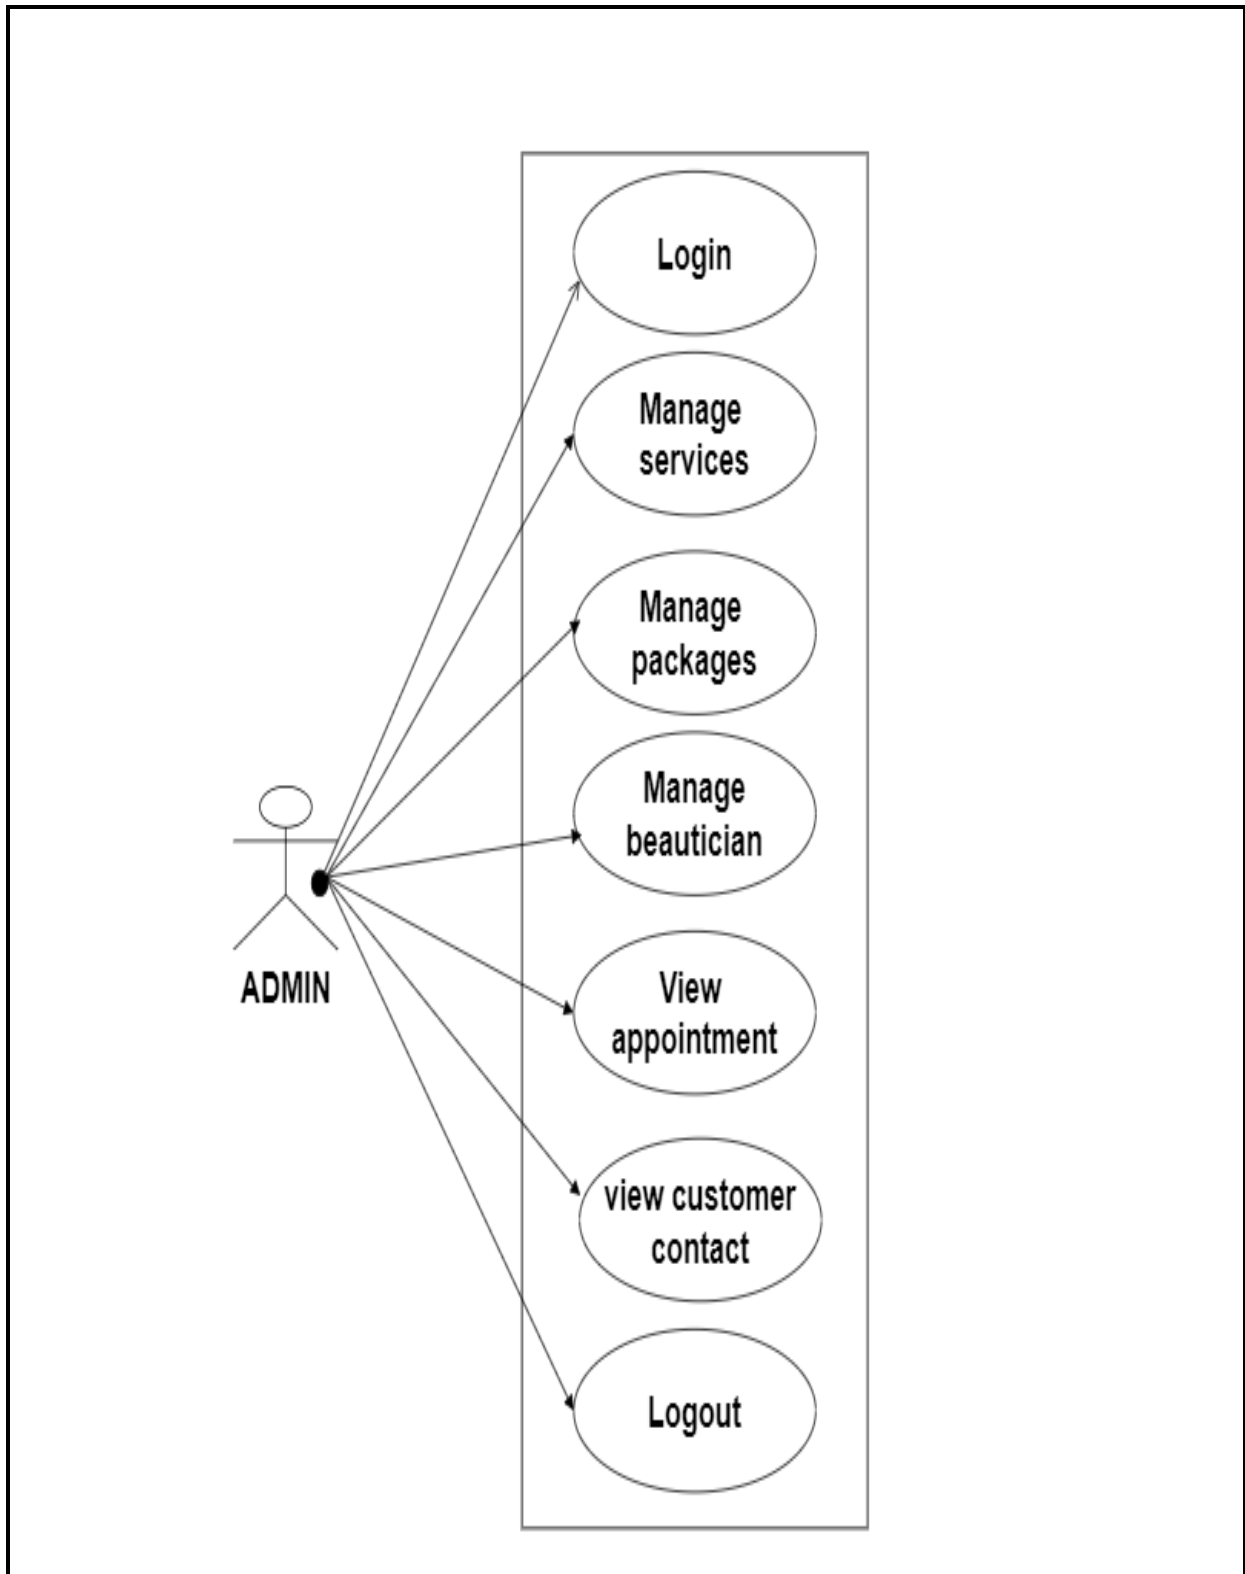

Figure 3.1 Usecase Diagram of Admin

2) User

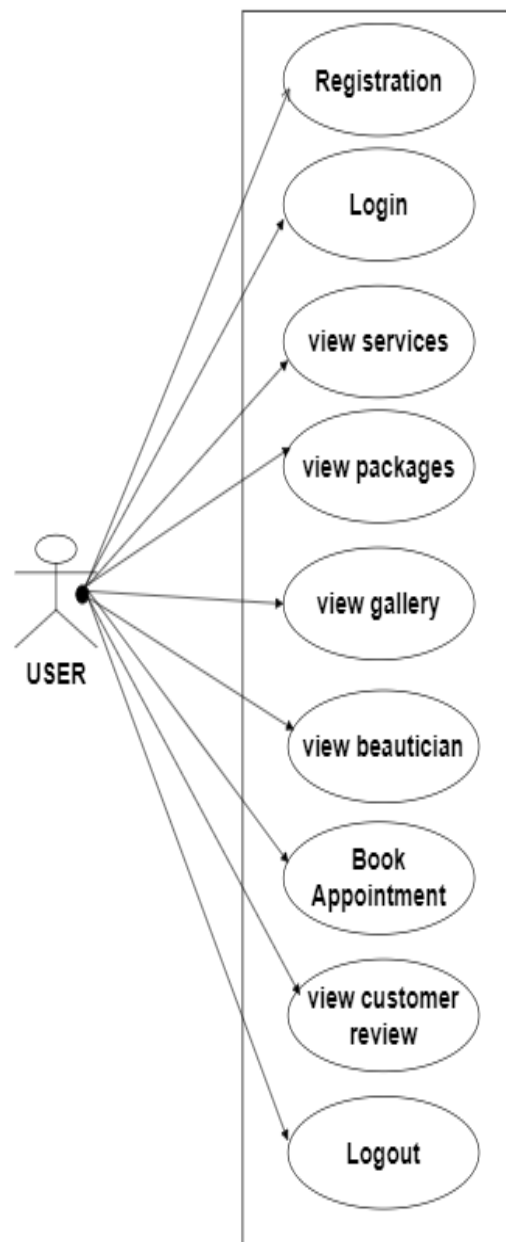

Figure 3.2 Usecase Diagram of Use

3.2 Class Diagram

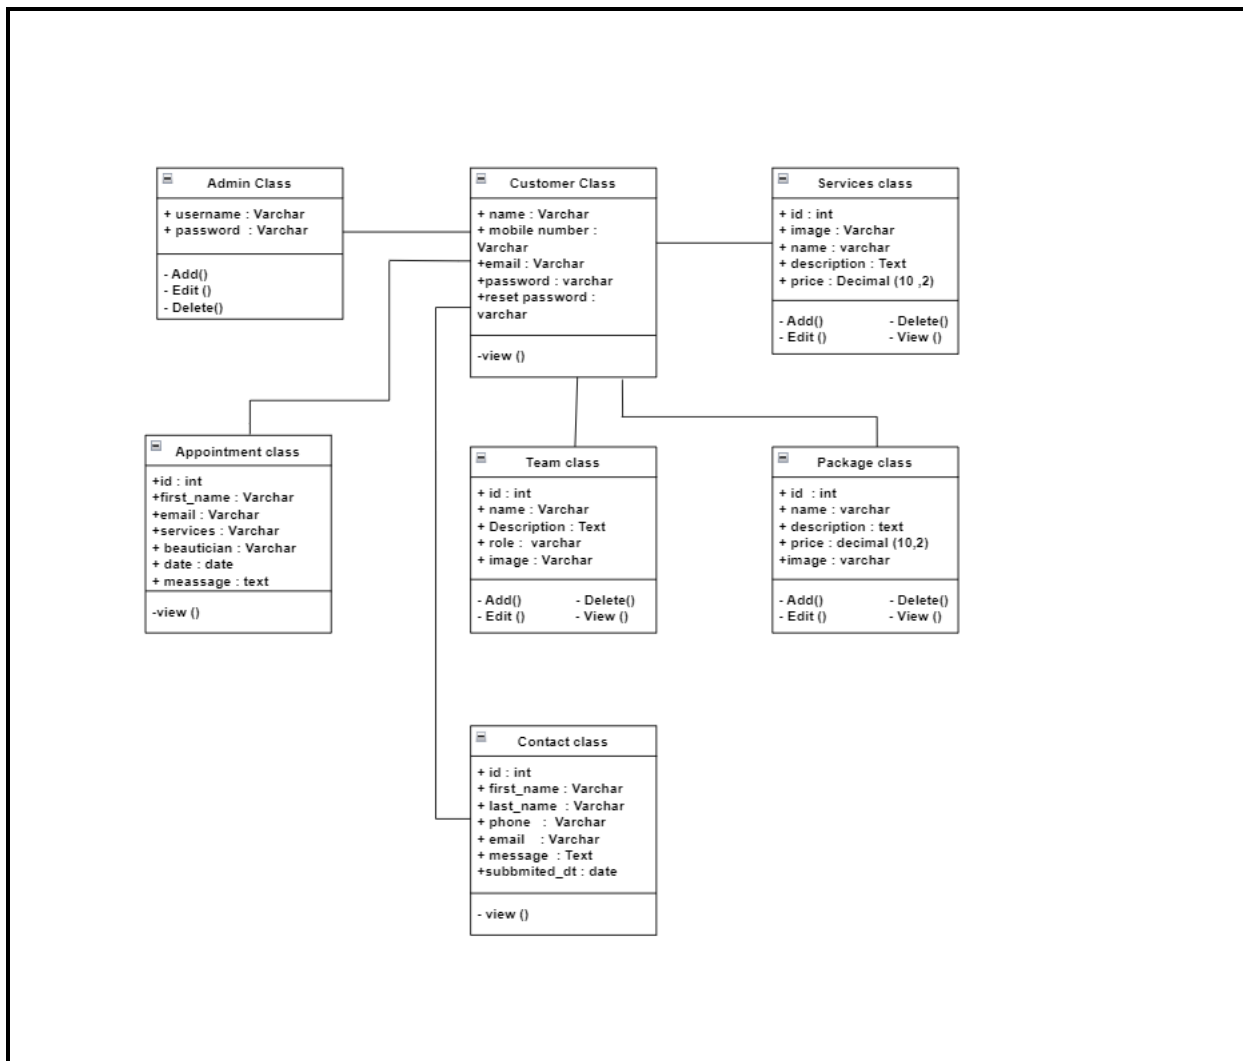

Figure 3.4 Class Diagram

3.3 Interaction Diagram

Interaction diagrams are models that describe how a group of objects collaborate in some behaviour typically a single use-case. The diagram shows a number of example objects and the messages that are passed between these objects with use-case.

An interaction diagram in a Unified Modelling Language (UML) is a kind of interaction diagram that shows how processes operate with one another and in what order. It is a construct of a Message Sequence Chart.

❖ Purpose:-

- The sequence diagram is used primarily to show the interactions between objects in the sequential order that those interactions occur.
- One of the primary uses of sequence diagrams is in the transition from requirements expressed as use cases to the next and more formal level of refinement.

1) Admin: -

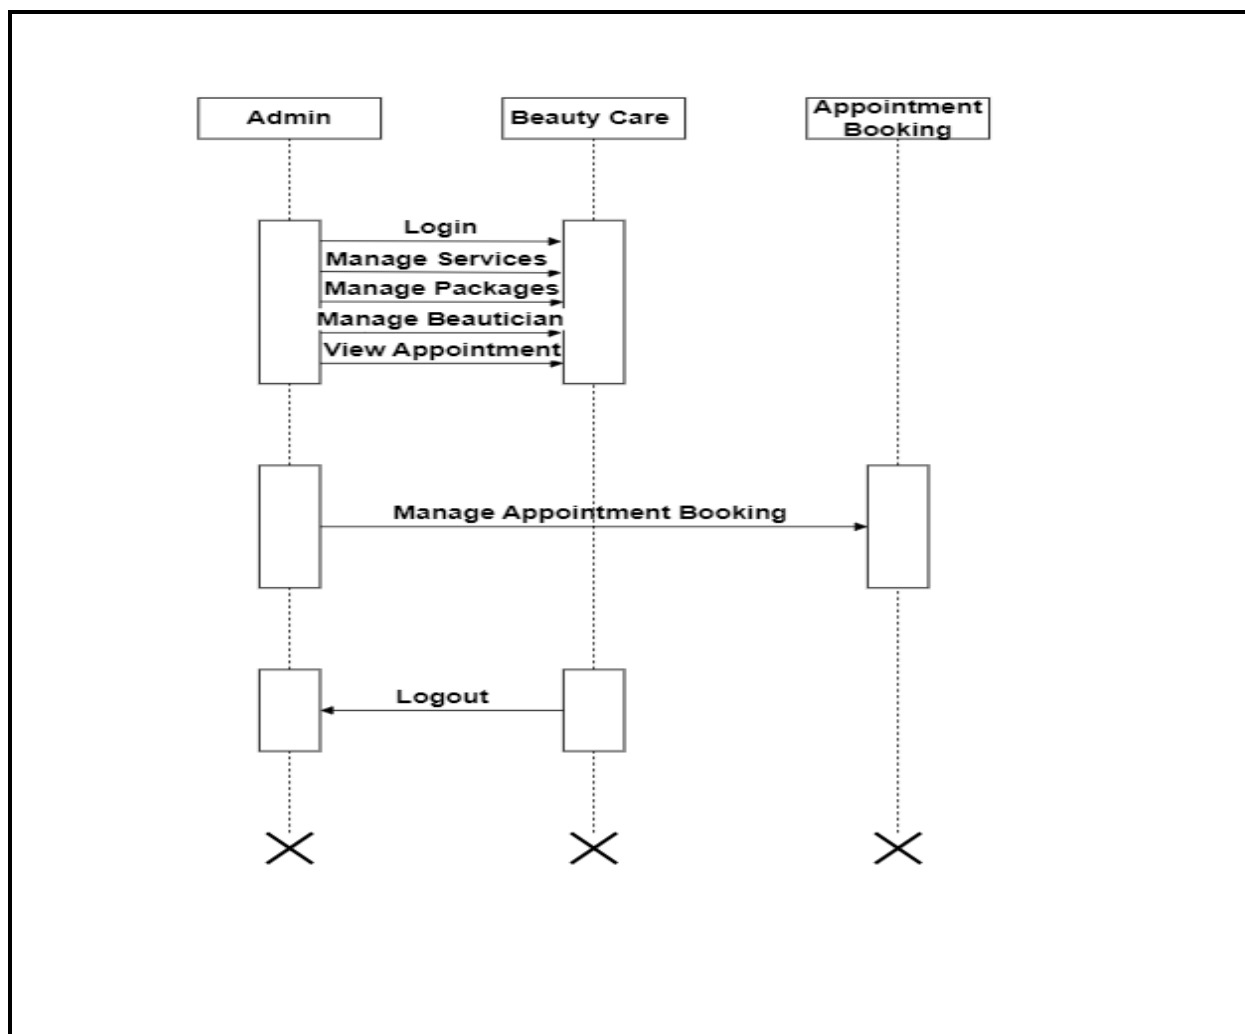

Figure 3.5 Interaction Diagram of Admin

2) User: -

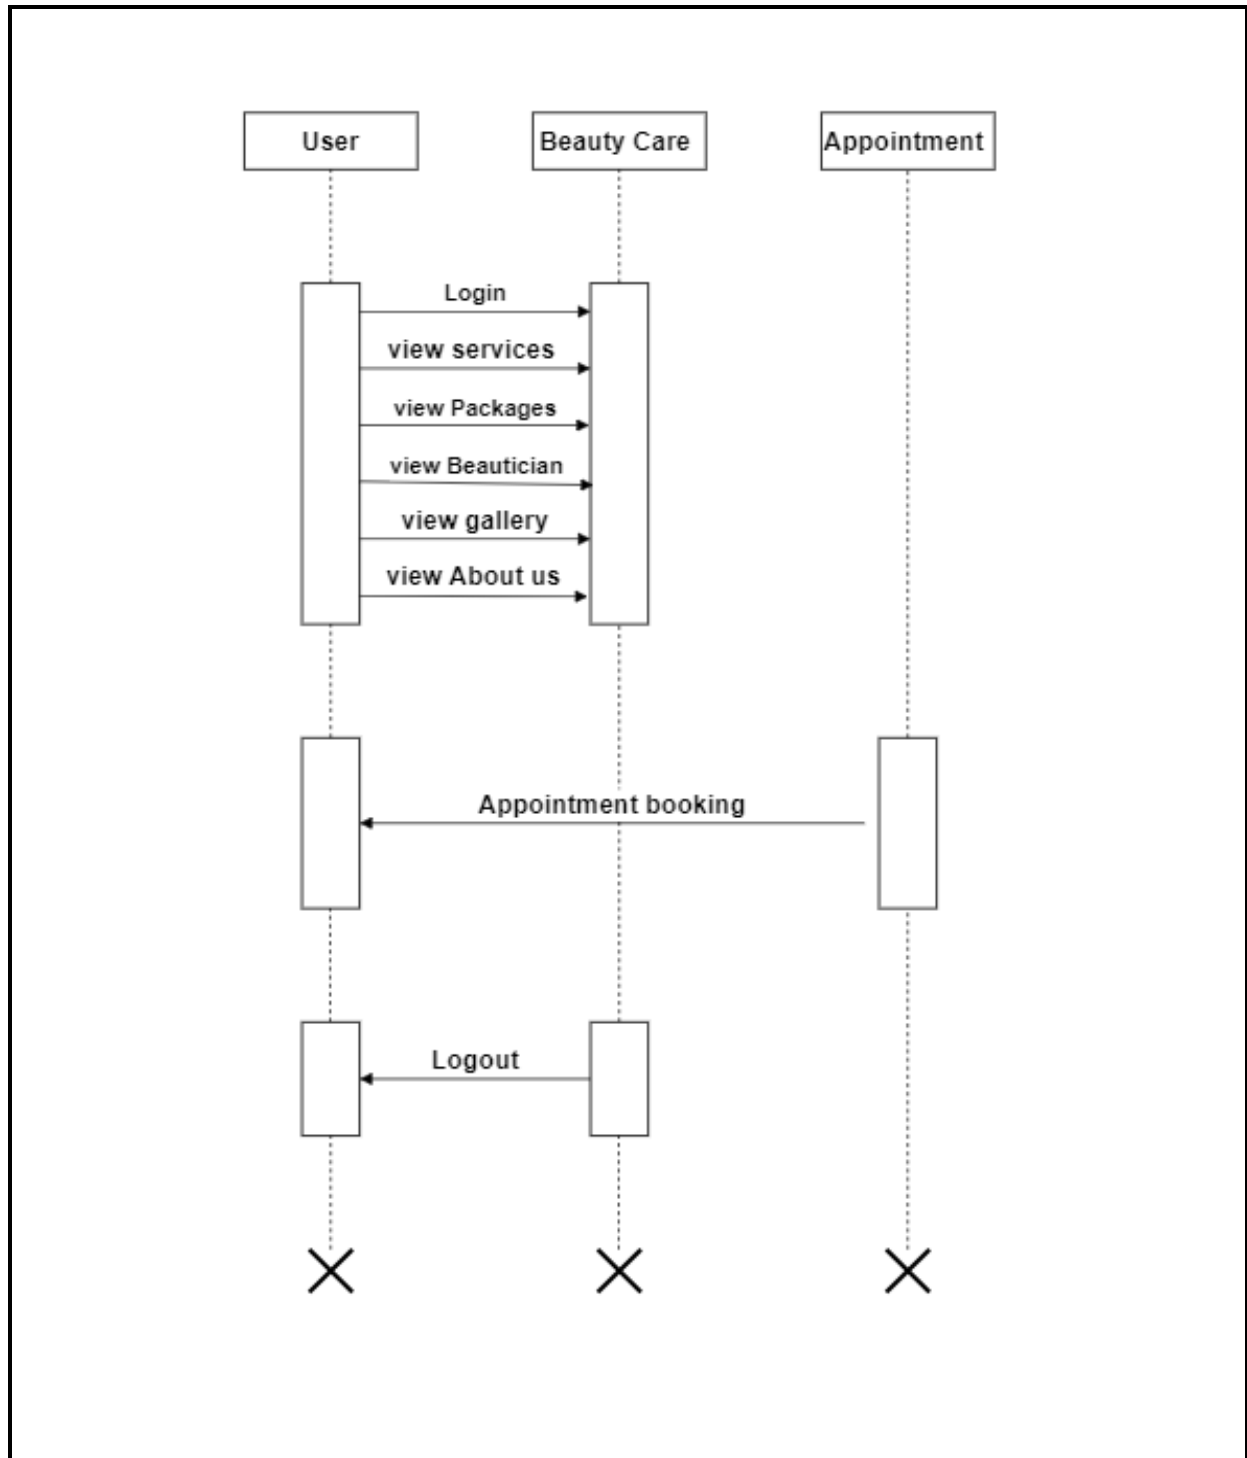

Figure 3.6 Interaction Diagram of Use

3.4 Activity Diagram

Activity diagram is another important diagram in UML to describe dynamic aspects of the system.

Activity diagram is essentially a flowchart, showing flow of control from activity to activity. The activity can be described as an operation of the system.

So the control flow is drawn from one operation to another. This flow can be sequential, branched or concurrent. Activity diagrams deals with all type of flow control by using different elements like fork, join etc.

Purpose:-

- It captures the dynamic behaviour of the system. Other UML diagrams are used to show the message flow from one object to another but activity diagram is used to show message flow from one activity to another.
- Activity is a particular operation of the system. Activity diagrams are not only used for visualizing dynamic nature of a system but they are also used to construct the executable system by using forward and reverse engineering techniques. The only missing thing in activity diagram is the message part.
- It does not show any message flow from one activity to another. Activity diagram is some time considered as the flow chart. Although the diagrams look like a flow chart but it is not. It shows different flow like parallel, branched, concurrent and single.

Elements of Activity Diagram:-

An activity diagram consists of the following behavioural elements:

- Activity
- Decisions
- Signal
- Concurrent Activities
- Final Activity

1) Admin: -

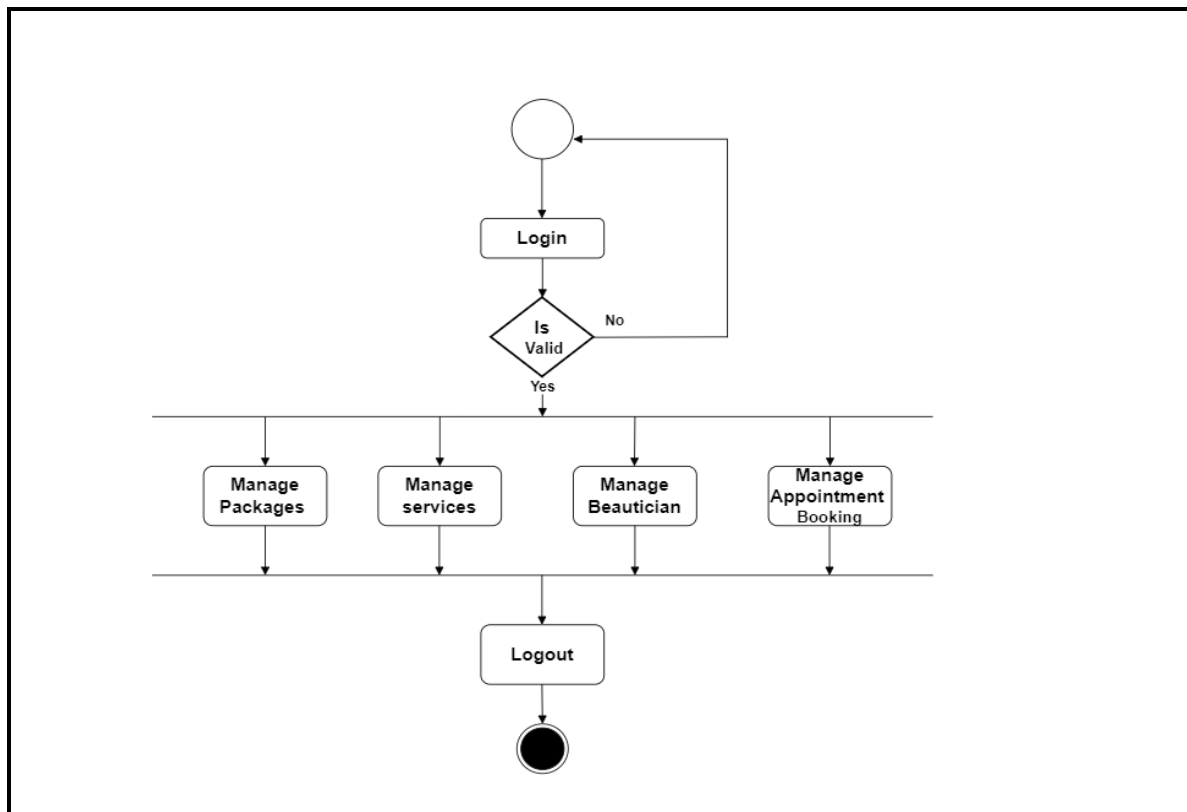

Figure 3.8 Activity Diagram of Admin

2) User

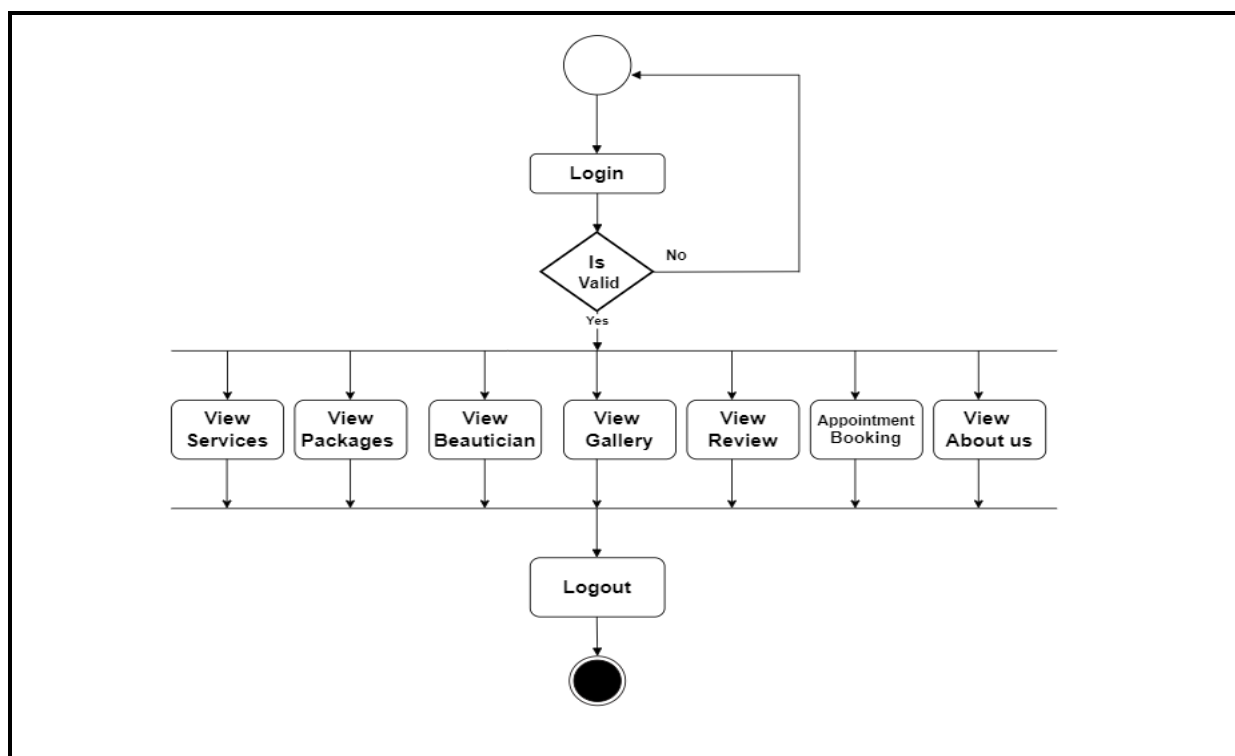

Figure 3.8 Activity Diagram of User

3.5 Data Dictionary

1) User :-

Field Name	Data Type & Size	Constrain	Description
Id	Int (6)	Primary key	Id is a primary key and auto increment
Name	Varchar(30)	-	Name of person
Mobile number	Varchar(15)	-	Mobile number of person
Email	Varchar(100)	-	Email of person
Password	Varchar (255)	-	Password for email
Reset_token	Varchar(255)	-	Reset password
Created_at	timestamp	-	Register time

2) Services :-

Field Name	Data Type & Size	Constrain	Description
Id	Int(11)	Primary key	Id is a primary key and auto increment
Image	Varchar(255)	-	Image of Services
Name	Varchar (255)	-	Name of Services
Description	Text	-	Description
Price	Decimal (10,2)	-	Price

3) Packages :-

Field Name	Data Type & Size	Constrain	Description
Id	Int(11)	Primary key	Id is a primary key and auto increment
Image	Varchar(255)	-	Image of Packages
Name	Varchar (100)	-	Name of Packages
Description	Text	-	Description
Price	Decimal (10,2)	-	Price

4) Team :-

Field Name	Data Type & Size	Constrain	Description
Id	Int(11)	Primary key	Id is a primary key and auto increment
Name	Varchar(100)	-	Name of Team member
Description	Text	-	Description
Role	Varchar (100)	-	Role of Team member
Image	Varchar (255)	-	Image of team member

5) Contact Us :-

Field Name	Data Type & Size	Constrain	Description
Id	Int(11)	Primary key	Id is a primary key and auto increment
First_name	Varchar(100)	-	First Name of user
Last_name	Varchar (100)	-	Last Name of user
phone	Varchar (15)	-	Phone number of user
Email	Varchar (100)	-	Email of user
Message	Text	-	Message text
Submitted_at	timestamp	-	Date of contact us

6) Book Appointment :-

Field Name	Data Type & Size	Constrain	Description
Id	Int (11)	Primary key	Id is a primary key and auto increment
First_name	Varchar(100)	-	Given Username in Admin
Email	Varchar (100)	-	Given Password in Admin

7) Admin :-

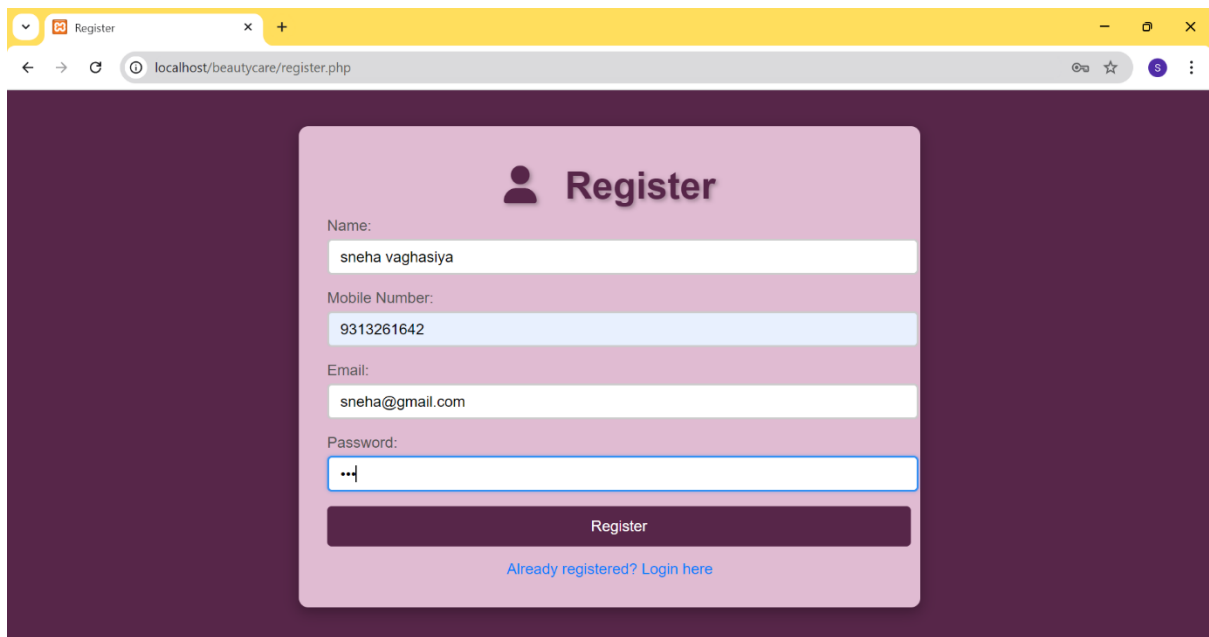

Field Name	Data Type & Size	Constrain	Description
Id	Int (6)	Primary key	Id is a primary key and auto increment
User Name	Varchar(30)	-	Given Username in Admin
Password	Varchar (255)	-	Given Password in Admin

4. Development

4.1 Screen Shorts

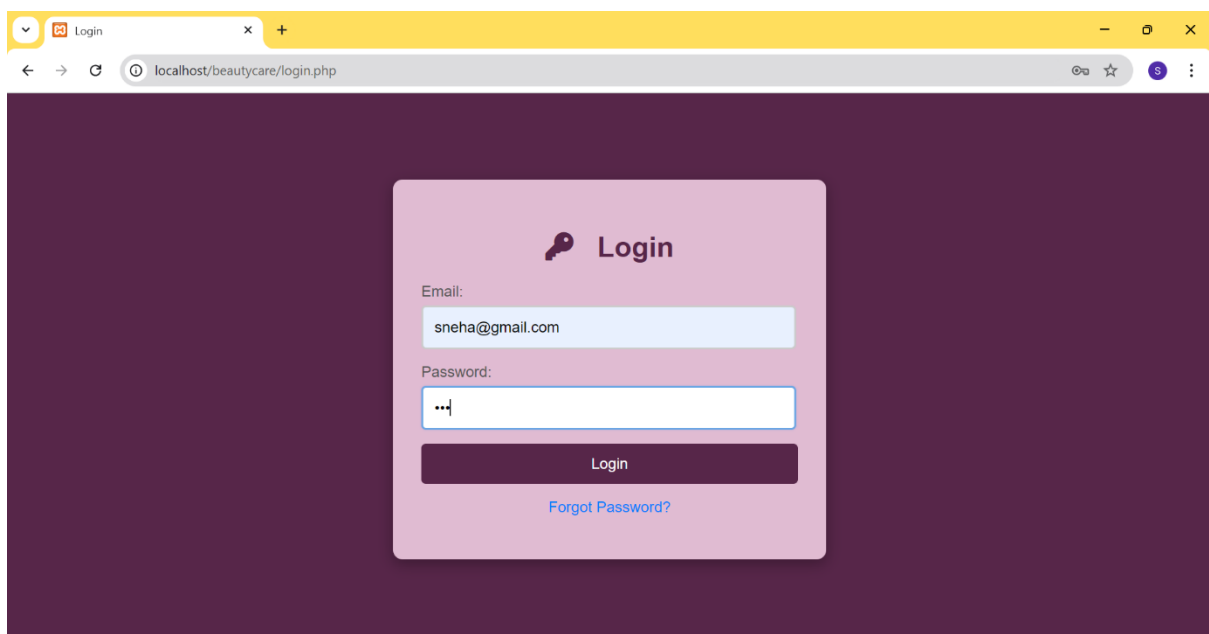

4.1.1. Client side :-

1) Registration page :-

A screenshot of a web browser displaying a registration form. The browser's address bar shows 'localhost/beautycare/register.php'. The form is titled 'Register' with a user icon. It contains four input fields: 'Name' (sneha vaghasiya), 'Mobile Number' (9313261642), 'Email' (sneha@gmail.com), and 'Password' (masked with dots). Below the fields is a 'Register' button and a link 'Already registered? Login here'.

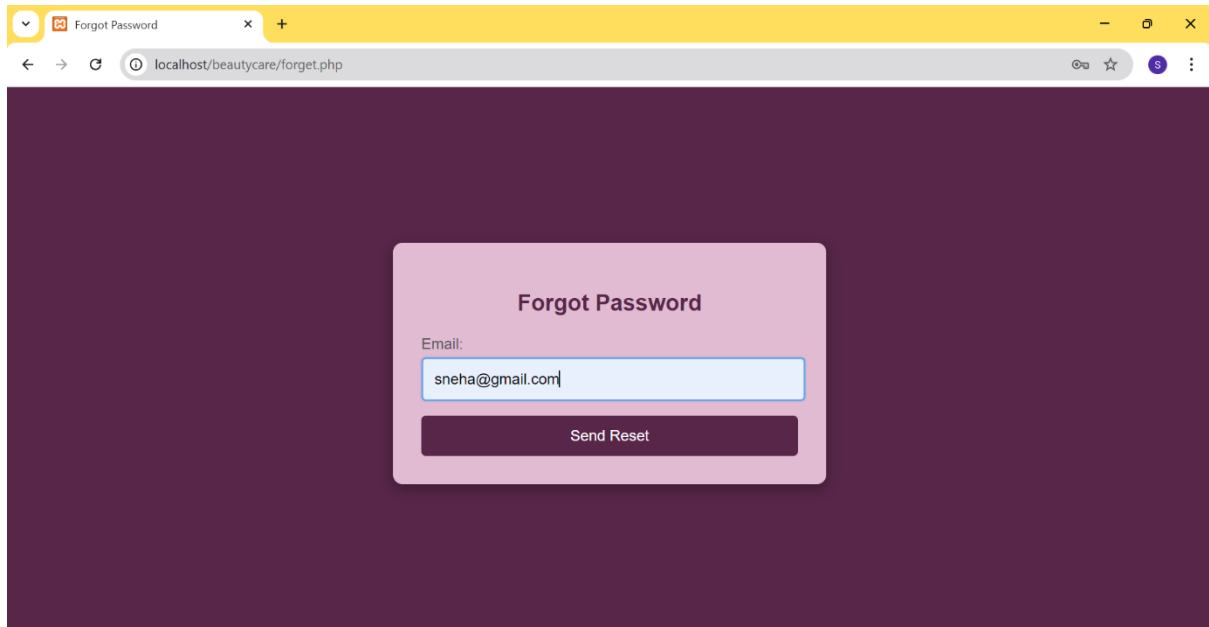

2) Login Page :-

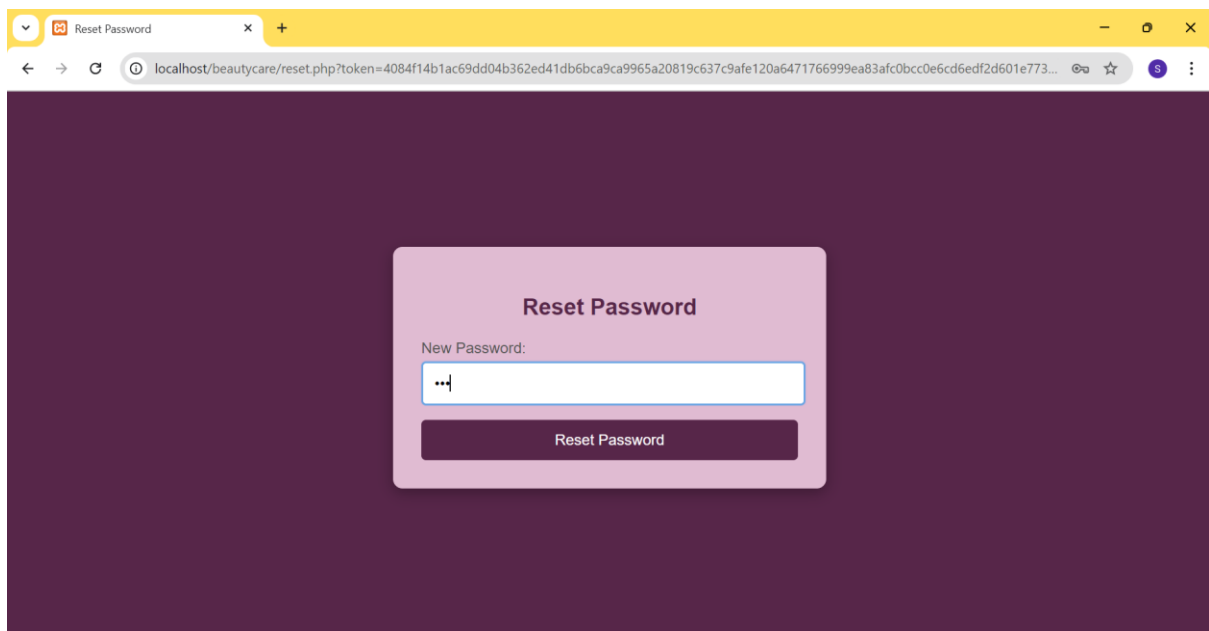

A screenshot of a web browser displaying a login form. The browser's address bar shows 'localhost/beautycare/login.php'. The form is titled 'Login' with a key icon. It contains two input fields: 'Email' (sneha@gmail.com) and 'Password' (masked with dots). Below the fields is a 'Login' button and a link 'Forgot Password?'.

- Password is changed then Forgot password

3) Forgot password :-

The screenshot shows a web browser window with the title 'Forgot Password'. The address bar displays 'localhost/beautycare/forgot.php'. The main content area has a dark purple background. In the center, there is a light pink rounded rectangle containing the title 'Forgot Password'. Below the title, the label 'Email:' is followed by a text input field containing 'sneha@gmail.com'. At the bottom of the pink box is a dark purple button labeled 'Send Reset'.

The screenshot shows a web browser window with the title 'Reset Password'. The address bar displays 'localhost/beautycare/reset.php?token=4084f14b1ac69dd04b362ed41db6bca9ca9965a20819c637c9afe120a6471766999ea83afc0bcc0e6cd6edf2d601e773...'. The main content area has a dark purple background. In the center, there is a light pink rounded rectangle containing the title 'Reset Password'. Below the title, the label 'New Password:' is followed by a text input field with masked characters '...'. At the bottom of the pink box is a dark purple button labeled 'Reset Password'.

FACIAL & CLEANUP

Activated charcoal is created from bone char, coconut shells, peat, petroleum coke, coal, olive pits, bamboo, or sawdust. It is in the form of a fine black dust that is produced when regular charcoal is activated by exposing it

cost of services ₹ 1200.00

BEEACH &D-TAN

De-Tan Bleach provides a solution for removing tan, improving skin glow and promoting a healthier, more radiant appearance.

cost of services ₹ 1800.00

MANI - PADI

A luxurious treatment including a soak and moisturizing exfoliation, cuticle work, nails clipped and filed, hard skin is removed (pedicure) and a renewing mask is applied.

cost of services ₹ 1000.00

WAXING

a hair removal method that involves covering the body with a sticky substance, like wax, and then removing the wax to pull out the hair from the root

cost of services ₹ 20000.00

MAKEUP

Makeup consists of things such as lipstick, eye shadow, and powder which some women put on their faces to make themselves look more attractive or which actors use to change or improve their appearance.

cost of services ₹ 3000.00

PRE-BRIDAL

Pre-bridal sessions are all about body cleaning, getting extra hair waxed, exfoliating skin, and even making sure your nails are glossed to perfection.

cost of services ₹ 5000.00

13) View Contact :-

The screenshot displays a web browser window with a yellow header bar. The address bar shows the URL `localhost/beautycare/admin/viewcontact.php`. The page features a dark purple sidebar on the left with the title "Admin Module" and a list of navigation items: Dashboard, Services, Packages, Team, Appointments, and Contact. The main content area has a light purple background and is titled "Submitted Contact Messages". It contains a table with the following data:

ID	First Name	Last Name	Phone	Email	Message	Date Submitted
1	sneha	vaghasiya	9313261642	jeel@gmail.com	very nice	2024-09-26 14:19:34

5. Enhancement of the system

- We give facilities to people send feedback to our site.
- The whole items gives by us.
- The user can purchase any items from case on delivery.
- A multiple user don't book application at a same time and same services
- In future we can change our template & also we will also put a new bridal item in this web-site.

6. Conclusion
